

Asar Zuluev

647-877-4897 | asar@asarmichil.com | asarmichil.com | github.com/asarmichil | Toronto, ON

Education

University of British Columbia – B.Sc. in Computer Science

Expected May 2027

Experience

Incoming Software Engineering Intern, Amazon – Toronto, ON

May 2026 – August 2026

Software Engineering Intern, SAP – Vancouver, BC

September 2025 – Present

- Proposed and built chart interaction architecture (Swift/UIKit) for new native iOS app, designing a scalable capability-driven model spanning 12+ chart types
- Eliminated 8+ hours/week of manual test reporting by building a custom test runner integrating Jira and Jenkins pipelines, automating test selection, execution, and result synchronization
- Resolved critical rendering bugs across **iOS** and web platforms during 10-major-version upgrade of legacy SAP Analytics Cloud chart rendering library
- Maintained 200+ test case iOS automation suite (**Java**/TestNG/Appium/Selenium) for 16-person team, running executions 4x weekly, fixing flaky locators, and owning biweekly legacy regression cycles

Co-op Software Developer, Golf918 (golf918.com) – Remote

June 2024 – January 2025

- Architected a multi-tenant B2B SaaS platform (**React**, **TypeScript**, Node.js, PostgreSQL, Redis, RabbitMQ) spanning 10 microservices, with 50+ customers and supporting \$400K first-year revenue as one of three primary developers
- Developed booking engine processing 4,500+ reservations with configurable timezone handling, dynamic pricing rules across venue/simulator/membership tiers, and embeddable widgets that integrate into client websites
- Owned internal admin panel enabling sales team to independently onboard new clients, reducing setup time from 4 days to same-day deployment and eliminating engineering bottlenecks

Software Developer Intern, LandPass – Toronto, ON

June 2023 – October 2023

- Delivered full-stack hunting land marketplace (**AngularJS**, GraphQL, PostgreSQL) featuring geographic boundary mapping, Azure AI document verification, and end-to-end booking workflows

Projects

Imgart — C++ Image Processing Pipeline — github.com/AsarMichil/imgart

- Designed C++ image processing CLI and Python library (pybind11) that generates printable paint-by-number templates and stained glass artwork from photos using superpixel segmentation, edge detection, and kd-tree accelerated Voronoi tessellation

You Exist — SvelteKit, Supabase, AWS S3/CloudFront — michils.com

- Shipped full-stack social platform with custom auth wrapping Supabase Admin API, server-side image processing pipeline (Sharp/S3/CloudFront), and full-text search using PostgreSQL tsvector

Auto Jockey — React, Python — github.com/AsarMichil/jockey

- Created full-stack DJ platform (FastAPI, Celery/Redis) with 1,600-line librosa/NumPy audio analysis engine extracting 15+ features per track including BPM, key detection, spectral energy, and optimal mix points
- Engineered dual-deck player UI with real-time waveform visualization (WaveSurfer.js), 3-band parametric EQ via Web Audio API, and automated transitions with BPM-matched playback rate adjustment

Technical Skills

Languages: TypeScript, JavaScript, Swift, Python, Java, C++, Go, C, SQL

Frameworks: React, Next.js, SvelteKit, Node.js, Express.js, FastAPI, SwiftUI, UIKit, Tailwind CSS

Testing and Dev Tools: Appium, Selenium, Git, Unix/Linux

Infrastructure: PostgreSQL, Redis, RabbitMQ, Docker, AWS, Jenkins, CI/CD
